REASONS FOR ALLOWANCE

I. The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teach a method for identifying a transaction corresponding to a plurality of service packets communicated between a source node and a destination node. The method includes further steps of providing a communications data set including a plurality of service packets and information relating to the order in which the service packets are communicated on a communications line between the source and destination nodes and comparing the communication data set against a pattern characterization data set to determine whether at least a portion of the plurality of service packets are part of the transaction. Rosborough et al., U.S. Patent No. 6,308,211 is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination, a method that provides an interconnect having a plurality of ports for a communicating transactions between a plurality of domains, identifying an error in one of the first and second portions of the transaction, and canceling the transaction responsive to identifying the error. In Examiner's opinion, the subject matter sought to be patented as recited in the claims in this application has practical applications in the field of arbitrating transactions between domains in a computer system.

Any comments considered necessary by applicant must be submitted **no** later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
